HEI**

Frontend Lead

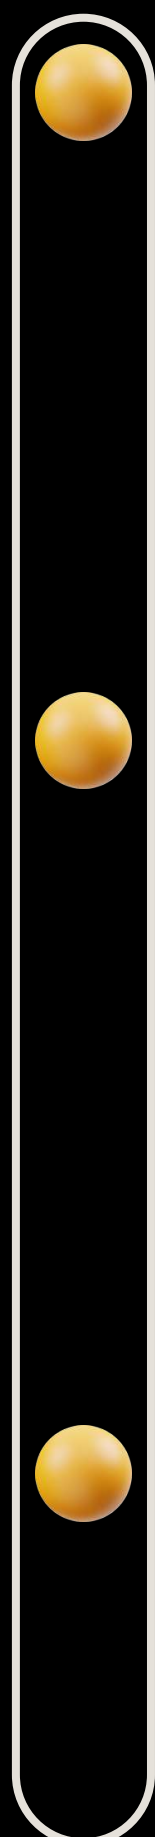

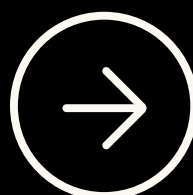

**BRYAN LOW
ZHERN YANG**

Backend Lead

PROBLEM STATEMENT

Data Fragmentation

Critical Info is trapped in manual logs, Whatsapp, and separate apps (POS vs. Accounting).

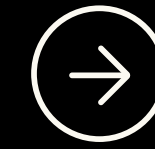

Reactive Operations

Owners only identify losses (e.g., high burn rates or staff overtime) during month-end reviews - when it's too late to fix.

The “Survival” Gap

High operating costs in Malaysia are squeezing margins, leaving zero room for human error.

THE SURVIVAL GAP

Food waste accounts for 30.6% of the 39,000 tonnes of solid waste Malaysia generates daily, literally 30% of an SME owner's inventory

Raw material and fuel costs has risen up to 50% over 5 years, owners are "surviving" on razor-thin margins.

Even though services sectors has the highest "birth rate" of new businesses, it also faces significant "death rate" (4.0% closure rate in 2024 alone)

OUR SOLUTION

“

FnB.AI

”

WHAT IS “FNB.AI”?

Centralized “Brain”

An integrated platform powered by “MODEL” that monitors finances, inventory, and staff.

Prescriptive Insights

Moves beyond static reports to provide daily briefings and actionable recommendations.

Scalable Architecture

Modular industry templates, starting with F&B- designed to fit any SME workflow.

HOW IT HELPS

GAPS

DAILY STRATEGIC BRIEFING

Generates a “morning briefing” card that highlights the most critical actions for the day.

PROACTIVE MONITORING

Automatically alerts owners to high burn rates, low stock levels, or unusual payroll patters.

WASTE REDUCTION

Predicts ingredient reordering needs based on past usage and upcoming seasonal demand.

OPTIMIZED OPERATIONS

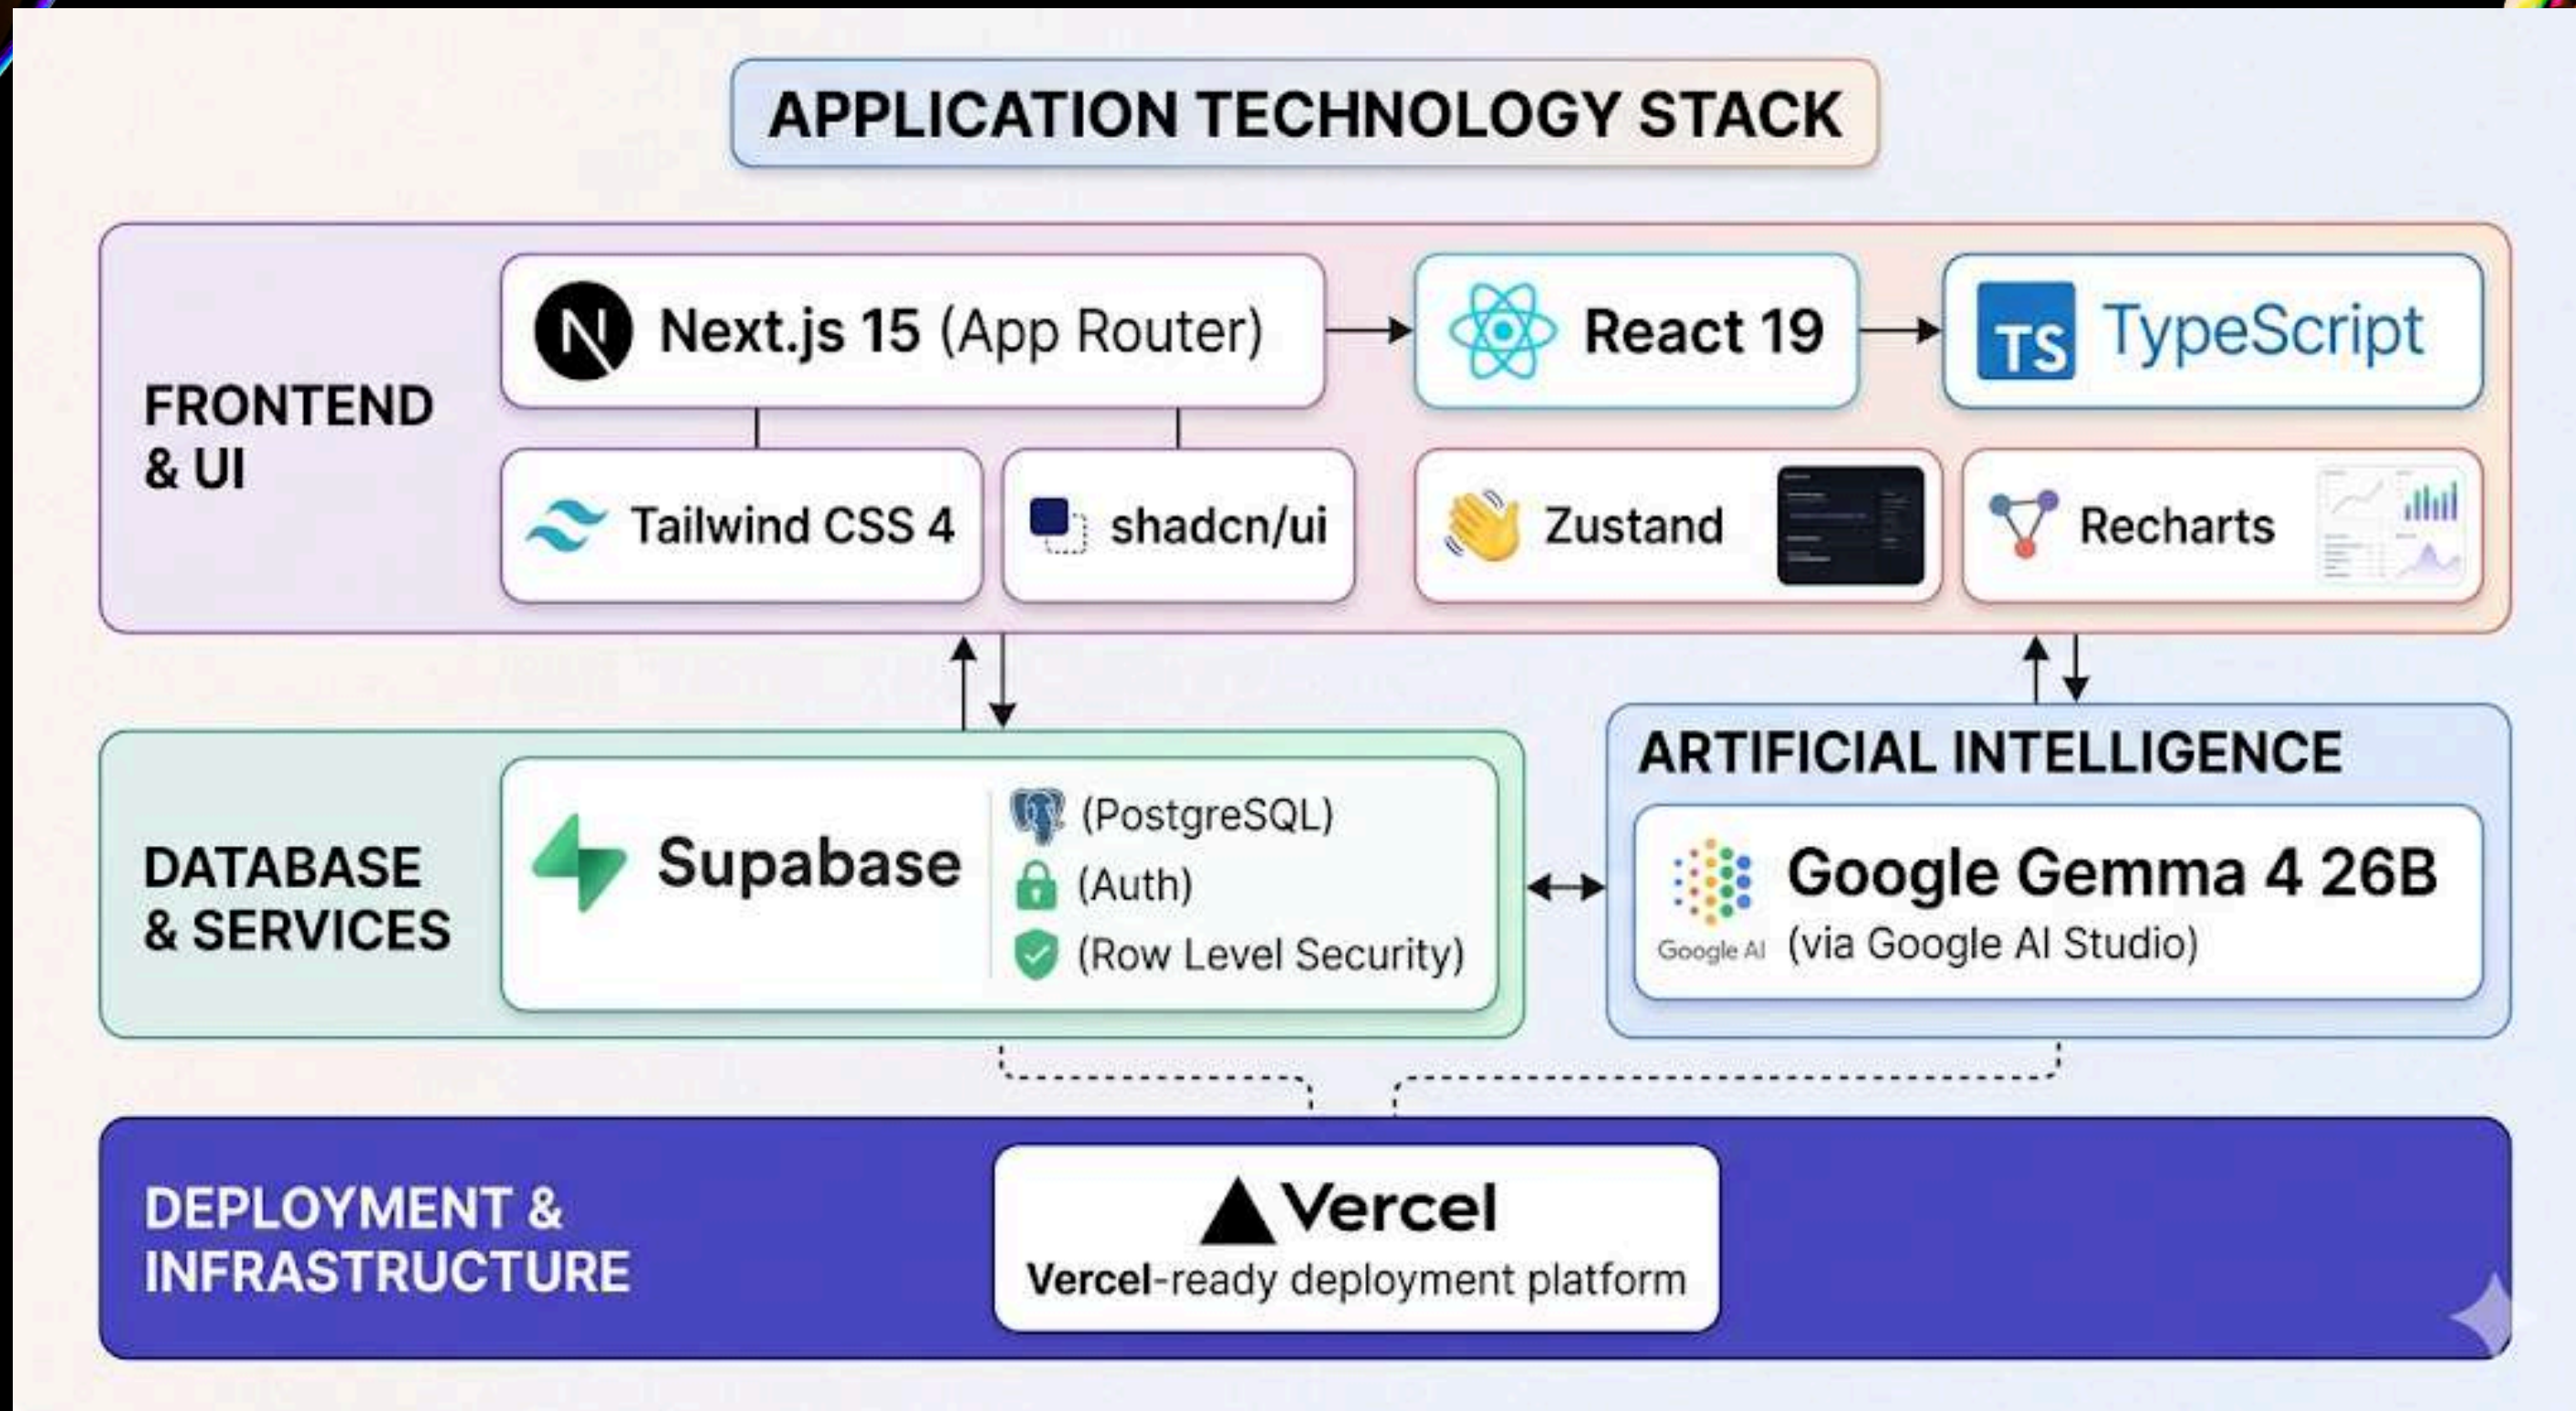

Suggests ideal staffing levels for peak hours to reduce labor costs without sacrificing service.

The background is black with several abstract elements. In the top left and top right, there are colorful, iridescent, liquid-like shapes that resemble soap bubbles or oil droplets. In the bottom left and top right, there are small white spheres. In the bottom right corner, there are faint, concentric circular lines.

SYSTEM DEMO

“FnB.AI”

TECH STACK

REVENUE MODEL

AI Skill Marketplace

- Future revenue stream where users can purchase “Expert AI Skills”
- e.g., Supplier Negotiation Advisor or Customer Churn Detector

Starter

Basic financial and inventory tracking for small stalls.

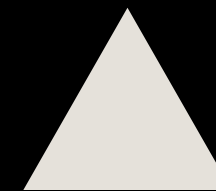

Growth

Includes AI Daily Briefing and automated restocking for busy cafes.

Enterprise

Multi-branch support for custom rule engines for large restaurant chains.

Tiered SaaS Subscription

SIZE OF MARKET

48,9000 to 50,000 SMEs.

TAM

TAM (Total Addressable Market):

- All 1.1 million + SMEs in Malaysia, which contributes 39.5% to the national GDP.

RM56 Billion

SAM

SAM (Serviceable Addressable Market):

- The Services sector, representing roughly 95% of **SME GDP**, specifically targeting the **\$14.75 billion** Malaysia Foodservice market

RM652.4 Billion

SOM

SOM (Serviceable Obtainable Market)

- Tech-savvy F&B owners in urban hubs who are currently seeking “Agentic AI” solutions to stay competitive.

COMPETITOR ANALYSIS

Capability	Traditional POS (StoreHub/Slurp!)	Accounting Tools (Biztory/Xero)	FnB.AI
Transaction Processing			
Inventory Tracking	 (Static)		 (Predictive)
SST Reporting			
Operational "Why"			 (AI Reasoning)
Actionable Briefing			 (Daily Strategic Card)
Custom Rule Engine			 (Agentic)

KEY COMPETITIVE ADVANTAGES

Agentic Execution

- Moves beyond chatbots to autonomous stock tracking and real-time workflows.

Natural Language Rules

- No-code setup for business guardrails and alerts using plain speech.

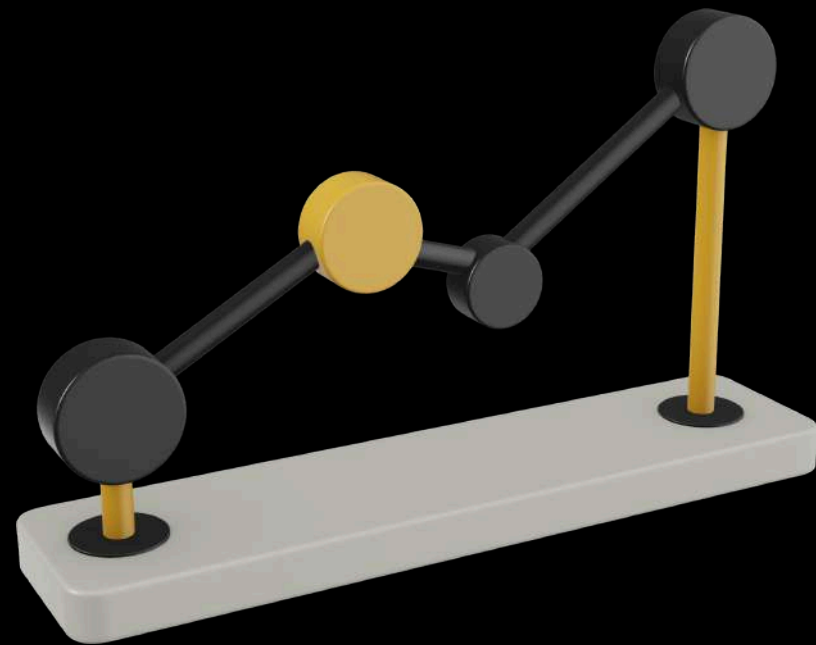

Prescriptive Briefings

- Replaces complex CSVs with “Daily Strategic Cards” targeting three high-impact actions.

Direct Margin Recovery

- Targets the 30.6% national food waste average to recover lost revenue.

Impact

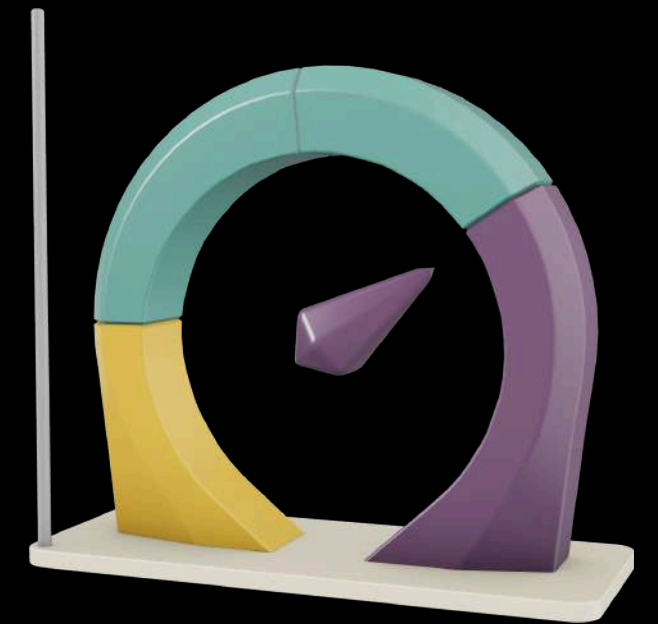

Resources
Efficiency

Optimization

Scalability for
Owners

Monitoring

Financial Health

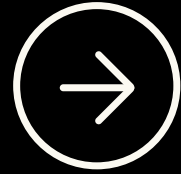

Overspending

Local Economic
Support

Industrial 4.0

ROADMAP

Multi-branch Integration

Consolidating data across **multiple locations** for centralized management.

Community Marketplace

Allowing developers to build and sell custom “AI Skills” for **specific niche industries** (e.g., Salons or Car Workshops).

Native Mobile App

Developing a **full iOS/Android app** to complement the current PWA.

Automated Supplier Integration

Enabling the AI to directly negotiate or place orders with suppliers based on its inventory predictions.

FNB.AI
